CAREER OBJECTIVE: Aspire to get an International Degree from a well-recognized university where I could learn new Tools and Technologies and that would help to obtain a full-time position in a multinational which offers a professional working environment.

EDUCATION

Bachelor's Degree in Engineering (B.E.), Computer Engineering

L.J. Institute of Engineering and Technology - GTU

2018 - 2022

9.17 CGPA

Higher Secondary School (HSC) Shraddha Vidya Mandir

2016 - 2018

86%

PROJECTS

Signal Clone (02/2021) 🔗

- Build a real-time chat app which looks like Signal app where user send messages instantly without any page refresh. Worked with React Native, Vector Icons, Font Awesome and Firebase.

Netflix Clone (03/2021) 🔗

- Used React.js, Redux, Axios, Material-UI and firebase to make the Frontend as same as Netflix website (Streaming platform).

E-Commerce Web API (06/2021) 🔗

- Designed the Complete Backend E-Commerce Web API Using Node.js With Express & MongoDB. E-commerce (electronic commerce) is the activity of electronically buying or selling of products on online services or over the Internet.

Movies App (11/2020) 🔗

- Created an effective movies website with the help of The Movie Database (TMDB) API and Bootstrap where user can search any movie and get the relevant information.

FarmFund (04/2021) 🔗

- Farmers can see all appropriate available subsidies list, know the price of crops in the Market yard and they can also stay in touch with others according to their union. Tools used: Android Studio, Expo client, Stack navigator

Recipe Finder (08/2020) 🔗

- The application offering a personalized Menu of recipes according to the particular ingredients and dishes field given by user. Formed with Html, Css, Semantic UI and Vanilla JavaScript.
